

**Engineers Australia's College of Biomedical Engineers – SA Branch and
The Society for Medical and Biological Engineering (SMBE)**

Jointly present

***"Fulbright Scholarships and investigating
the use of FES to improve function and
movement in children with CP"***

Last year David Hobbs, a Rehabilitation Engineer at Novita Children's Services, was awarded a Fulbright Professional Scholarship to conduct a research project in the United States. He spent 5 months at leading centres of excellence investigating the field of functional electrical stimulation (FES) for children with CP.

David's seminar will highlight his experiences in America including an overview of the Fulbright program, how the latest and greatest FES research and technology is helping people with CP, and how he survived living in the US for 5 months. Details of the new **SA Fulbright Scholarship** will also be highlighted on the night. All are welcome and there will be plenty of time for questions and discussion.

Event details:

- Date:** Wednesday 29th April 2009
- Venue:** Chapman Hall, Engineering House, 11 Bagot Street, North Adelaide
- Time:** 5:30pm, for a 6pm start (light refreshments served from 5:30pm)
- Contact:** David Hobbs (david.hobbs@novita.org.au or 8243 8338)
