## **AS/NZS 3003 - Electrical Installations – Patient Areas**

Speaker

### **Stuart Clifton**

Stuart is the chair of the standards committee responsible for the development and revision of AS/NZS 3003 and one of Australia's most experienced Biomedical Engineers when it comes to its application and interpretation.

A draft of the latest revision is now open for public comment so this is an ideal opportunity to come along and ask some questions or share your thoughts on this most important document whilst you are still able to provide input.

The draft of AS/NZS 3003 (DR10009) is available at the following link

<https://infostore.saiglobal.com/store/Details.aspx?ProductID=1391359>

There are many changes in this draft standard including the requirement for annual inspection of electrical areas, changes to the boundaries of areas and the requirement that all home care areas using class I equipment or type B applied parts to be protected.
