

Biomedical Engineer Technician

- Take your experience to the Pacific to make a lasting difference
- \$86,500 per annum plus benefits –12 month contract
- Tuvalu, Kiribati and Nauru

Successful PACTAM deployees share the ethos of Australian Volunteers International.

Key objectives of this important role are to improve accessibility and condition of biomedical equipment resources throughout the Pacific island nations of Tuvalu, Kiribati and Nauru along with increasing the capacity of biomedical staff and technicians to manage, repair and maintain medical equipment. You are a 'can do' person who can turn your hand to a wide range of activities stretching from theatre to x-ray maintenance, prepared to travel extensively to outer islands and other Pacific Islands on a regular basis.

Develop national guidelines for biomedical equipment management. Provide and recommend in service training for medical, nursing and health staff. Handle performance, safety testing, repair, maintenance of medical, laboratory and x-ray equipment.

To take your interest further, please call with any queries. We will ask you to tell us about:

- Your extensive experience in maintenance and repair of a wide range of biomedical equipment and electronics and relevant qualifications
- Your experience in providing training activities for a wide range of medical/hospital staff
- Your previous experience living and working in the Pacific, developing countries and/or remote communities and proven track record working with staff from those countries.

The allowances package includes \$86,500 per annum plus housing allowance, relocation, airfares and insurance.

This position is part of the Pacific Technical Assistance Mechanism (PACTAM), which places highly-skilled deployees in the Pacific to assist local employers to meet their human resource needs and contribute to building capacity in the workplace.
